# **ASLI HAST accelerated aging chamber**

HAST accelerated aging chamber

# **Application:**

HAST accelerated aging chamber is widely applied to the testing of sealing property for multi-layer circuit board, IC sealing package, LCD screen, LED, semi-conductor, magnetic materials, NdFeB, rare earths and magnet iron, in which the resistance to pressure and air tightness for above mentioned products can be tested out.

# HAST accelerated aging chamber technical parameters:

Model	HAST - 25	HAST - 35	HAST - 45	HAST - 55	HAST - 65				
Internal Dimension ΦxD (mm)	300x250	350x450	450x550	550x650	650x750				
External Dimension ΦxD (mm)	850x1300x900	900x1350x900	1000x1480x1000	1150x1650x1200	1300x1800x1350				
Steam Temperature Range	Steam Temperature Range: 100°C~135°C, (143°C is optional)								
Relative Pressure/ Absolute Pressure	Relative pressure: display values indicated on the pressure gauge Absolute pressure: pressure gauge value adds 100 Kpa (The actual value in the inner box)								

Comparison Table of Temperature, Humidity, Pressure	日 100 100 100 100 100 100 100 10		2.0 kg/cm2					
Steam Humidity	70~100%R.H. steam humidity adjustable							
Steam								
Pressure(Absolute	101.3Kpa $+0.0$ Kg/cm <sup>2</sup> ~ $2.0$ Kg/cm <sup>2</sup> ; ( $3.0$ Kg/cm <sup>2</sup> is special standard)							
Pressure)								
Recursive Device	Steam in forced-circulation							
Safety Protective	Water short storage protect, over pressure protect.(have automatically/manual water							
Device	replenishing, automatically discharge pressure function)							
Accessories	Two layers stainless steel plate							
Equipment	1.7	40	0.7	1.5.5	250			
Capacity(L)	17	43	87	155	250			
Power	AC 220V(±10%), 1 § 3 Lines ,50/60HZ; AC 380 V(±10%) ,3 § 5 Lines,50/60HZ							

### safety device:

- 1. Safety device for the pot: If the inner box is not closed, the machine can not start
- 2. Safety Valve: When the inner box's pressure higher than the machine's undertake value, it will self-relieve.
- 3. Double overheat protection device: When inner box's temperature is too high, it will alarm, and Automatic cut off the heating power.
- 4. Cover protection: The inner box's cover is made of aluminum alloy, can protect the worker from scald.

### **HAST** accelerated aging chamber features:

1. Automatic adding water function, and automatic filling water upon the water short storage while testing.

- 2. Automatic operation to test process finished, easy to use.
- 3.Temperature control: LED digital temperature controller can make accurate testing of temperature setting, control and display.
- 4. LED digital timer, when the inner box's temperature reached the setting value, then start to time to ensure the test complete.
- 5. Accurate pressure: temperature chart always shows the inner box's pressure and relative humidity.
- 6. Water device is automatically discharge not saturated steam in order to achieve the best steam quality.
- 7.A integrated silica gel door gasket, air tightness is very good, and long operation life.
- 8. The inner box is mirror-polished, graceful and non-pollution
