## ■ Product description-

CM1-RL series provides a simple economic programmable speed/velocity table, it $\mathbf{2 0 . 0} \mathbf{m m}$, 5 -digit LED display, press the key to set the display range and its anti-jamming design and reliable quality, simple installation, you can meet the needs of general measurement of speed/velocity.
This instrument also has 2 group relay outputs, 1 analog output, or
 1 groups RS485 (Modbus RTU mode) communication features three a (More features please refer
to page description). Operation press the inner design, the more human-no action can be avoided, especially suitable for all kinds of machinery used.

## ■ Feature :

- Free input frequency of $1 \mathrm{~Hz} \sim 6 \mathrm{KHz}$, does not need to specify the frequency range input mode (NPN, PNP, and forth.) and pulse dial switch level by means of direct switch
- Purchase 2 to attach three to choose a group of relay outputs, 1 analog output, or 1 groups RS485 (Modbus RTU mode) communication
- Operation press the inner (in front), according to field requirements set display scope; Terminal straight into design, bad problem-free installation depth only 72 mm

## $\square$ Application :

- Tie in with the adjacent switches, photoelectric switch speed/wire speed display, control and RS485 data collection

## ■ORDERING INFORMATION

## -TECHNICAL SPECIFICATION

| Input |  |  |
| :---: | :---: | :---: |
| Input Frequency | Input Mode | Input Level |
| $1 \mathrm{~Hz} \sim 50 \mathrm{~Hz}$ | Mech. Contact |  |
| $\begin{aligned} & 1 \mathrm{~Hz} \sim 50 \mathrm{~Hz} \\ & 1 \mathrm{~Hz} \sim 6.00 \mathrm{KHz} \end{aligned}$ | NPN | High Level: over $2 / 3$ of input level Low Level: under $1 / 3$ of input level |
|  | PNP |  |
|  | Voltage Pulse |  |
| Input Mode (NPN, PNP, Contact) \& Level ( 5 V p, 12Vp, 24Vp) changeable by dip switch of rear terminal block. |  |  |

## Calibration:

A/D conversion:
Accuracy:
Sampling time:
Response time:

Doesn't need calibration
Pulse direct-reading, none A/D conversion

## INSTALLATION

The meter should be installed in a location that does not exceed the maximum operating temperature and provides good air circulation.

PANELCUT-OUT:
$92{ }^{(W)}$ ) $44^{+0.2}(\mathrm{H}) \mathrm{mm}$

## CONNECTION DIAGRAM

Please check the voltage of power supplied first, and then connect to the specified terminals. It is recommended that power supplied to the meter be protected by a fuse or circuit breaker. $1 \pm$
