DHS Series Moisture Analyzer

Description

DHS series moisture analyzer configures high precision weighing sensor and high efficiency halogen lamp heat device on the basis of electronic balance, to reach the rapid and accurate moisture determination. High quality and inexpensive.

This series is widely used in the scope of tobacco, papermaking, food, tea, beverage, grain, chemical raw materials, pharmaceutical raw materials, texture raw materials etc., testing the moisture content of samples.

Model	DHS16-A	DHS16-B
Capacity	100g	50g
Resolution	0.001g	0.001g
Repeatability	$\leq\pm 0.003$	$\leq\pm 0.003$
Linearity Error	$\leq\pm 0.003$	$\leq\pm 0.003$
Load cell	HBM load cell	
Operational Temp.	5 °C to 40 °C	
Pan Size	90mm	
Heat Source	Halogen Lamp	
Temp. Range	30°C to 160 °C	
Moisture Range	0.00%-100.00%	
Time Setting	0-99 minutes, interval 1 minute	
Number of Storage	10 groups	
Display	5inch Touch Screen	
Calibration	External Calibration	
Body dimension	370 x 215 x 195 mm (L x W x H)	

Packing Size	445 x 300 x 330 mm (L x W x H)
Power	110v or 220v
N./G. Weight	3kg/4.5kg
Connectivity	Configurable RS 232 interface

Category: Moisture Meter / **Tags:** FR, Moisture Meter
