

Centrifuge

Mini-Centrifuge LX-200

Model: LX-200

Creative designs with multipurpose flexibility. It is fully formed by super-strong injection molding and equipped with multiple centrifuge rotors acceptable for 1.5ml, 0.5ml, 0.2ml centrifuge tubes and PCR-used 0.2ml 8 rows of centrifuge tubes, totally replacing imported products. This switch design of humanization (press the top, it will open until it is disopened), with fully transparent top and multiple rotors, represents completely the up-to-date principle of "serving scientific research based on human".

Mini-Centrifuge™

RPM7000/RCF2000g Capacity 6*1.5ml 6*0.5ml 6*0.

2ml 16*0.2ml
