

# Manual PCB Depanelizer

---

## Manual PCB Depaneling, CWV-1M460 Features:

- Round knife, manually cutting against lower linear knife, for reduced stress
- Separate pre-scored PCB assembly without stress on either PCB or component
- Separating speed is adjusted by handwheel
- Handle Intermittent scoring or cut-outs
- Board with projected component can be cut precisely
- Large stainless steel platform on both side of cutting blade prevents board wobble and table height and angle are adjustable.
- Clearance between circular and linear blades are adjustable to fit different groove depth and compensates for blade wear out .

**Manual PCB Depaneling, CWV-1M460 Specification:**

Max Cutting Length	460mm
Blade Length	480mm
PCB Material	FR1, FR4, CEM1, CEM3, MCPCB
Cutting Speed	Depends on operator, no power required
Machine Weight	30kgs
Blade Material	High Speed Steel
