

HL Series Standard Current Transformer

I. Introduction

1. This product is composed by primary winding and secondary winding
2. To test according the standard current marked on the name plate.
3. Can do 5/5 or 1/1 current self calibration.
4. with roller, easy to transport.

II. Features

1. This product is composed by primary winding and secondary winding
2. To test according the standard current marked on the name plate.
3. Can do 5/5 or 1/1 current self calibration.
4. with roller, easy to transport.

III. Parameters

Temperature	-5°C~+40°C
Humidity	<80%
There should not be strong external electromagnetic field which has nothing with work at the working area	
Allow long-term work under rated current.	
Dimension (HL-22/23)	370*170*440mm3
Weight (HL-22/23)	13kg
Dimension (HL-32/33)	330*190*430mm3
Dimension (HL-53/62/63) /(HL-62C/63C)	470*230*570mm3
