Automatic Single Color Plastic Film Flat Bed Screen Printing Machine

Application:

It is a big size vertical flat screen printing machine with auto unloading device, adopting distyle constructure, double conversion system, operating fastly and steadily. It is suitable for printing PVC, it can only print film sheet, pvc sheet, key film, pp sheet, paper, plastic sheet . and high precision screen printing within printing area 500*700mm

Function:

1. PLC controller, touch panel ,
2. Auto 4-digit counter built-in
3. vertical constructure, the screen frame lift up and down vertically by electricity, driving transversa stroke of printing head left and right action by imported linear slide
4. printing and screen frame up and down are driven independently
5. controlling printing blade up and down by transducer system, controlling stroke by photocell eye, adjusting independently
6. kinds of printing cycle designed by printing action, you can be free to choose according to your printing craftwork.
7. setting up three types, manual, semi-automatic, fully automatic. When printing is indirect, it will be controlled by digital
8. finished and high-strength hard work-table with even suctionhole and high vacsorb, that can make sure overprinting accurately.
9. unique designed machine head up and down equipment, it is convenient to clean scraper, reclaim blade, screen frame
10. double guide pole controlling screen arm, installing the device for adjusting screen distance, regulated conveniently
11. installing scrambling device on work-table, it accord with safty standard.

Technical parameter:

- 1.Max.printing area:500*700mm
- 2.Max.printing speed:1000PCS/Hr
- 3.Power:380V/50HZ
- 4.Air pressure:5-7bar
- 5.Worktable size:700*1100MM
- 6.Max.workpiece height:0-20mm
- 7.Number of Color: single color
