Easy replacement of needles.

No tools are required.

Equipped with a filter.

Removes particles on the hose inlet side.

Hose does a three-sixty for easy handling.

Superior usability!

Ergonomic design.

New shape close to straight enables to operate at recesses.

Iron works, Shipbuilding, Bridge, etc...

Low vibration

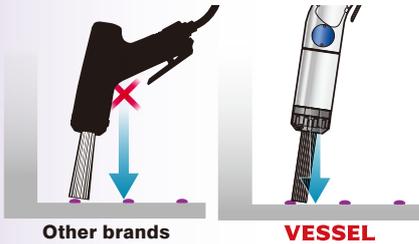

Light-weight

High speed

Powerful

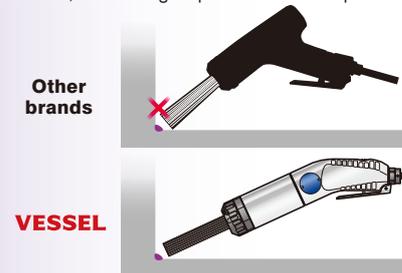

1. Superior usability

Barycenter at the front side reduces the burden on your wrist.
Simple operation can be made by just press.

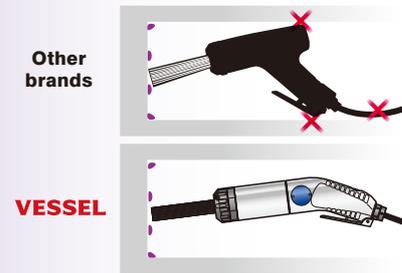

2. Needles are less deformed.

Needles are less widened because you can control the reaction, and on-target operation becomes possible.

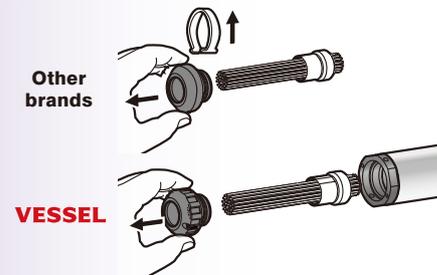

3. Recesses can be cleaned as planned.

Slim design enables to perform even in a recess where a pistol-type of chisel scaler cannot be used.

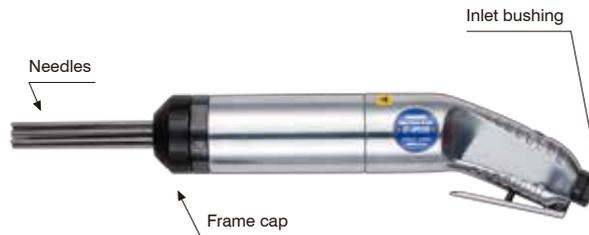

4. Easy needle replacement

You can replace it without any tools. What's more it does not come off because of the lock mechanism.
