T 65 basic ULTRA-TURRAX®

/// Data Sheet

Extremely powerful dispersing instrument for volumes from 2 - 50 I (H2O) for typical pilot plant stations. A fixed speed of 7200 rpm enables users to work at a high circumferential speed even with small rotor diameters. Three rotor-stator configurations guarantee a wide range of applications. Reproducible operations due to constant speed even with changes in viscosities.

- Electronic overload protection
- Cables and plugs not included in the delivery
- Plug-in connectors facilitate exchange of dispersing elements
