

## DLPLC-YLJC1 Temperature-Pressure Detecting Training Device

### ■ Overview

- The device integrated with PLC, temperature sensor, pressure sensor, flow sensor, solenoid valve, heater, hand valve and water pump. Switch control and timing logic control on solenoid valve and water pump by collecting sensor signals and PLC programming to complete liquid level switch and close-circuit automatic control.

### ■ Technical Parameter

- Total dimension: 680×450×560mm
- Input power: single-phase AC220V±10% 50Hz/60Hz
- Capacity: < 2500VA

### ■ Optional

- Computer, PC software
- Computer desk

- HMI module
