SCK-40 Cardboard box opening machine

Equipment characteristics:

It is suitable for opening cartons with various sizes. If the carton specifications are changed, manual adjustment can be made, and the operation is simple and convenient.

Automatic opening, automatic folding lower cover, automatic sealing carton bottom, the machine adopts PLC+ man-machine interface control. It is easy to operate, simple in maintenance and stable in performance. It is an essential assembly line equipment for automatic scale production.

Do not stop at the bottom, complete the folding bottom and the bottom in the transmission; 3 seconds complete the whole process of suction box, molding, bottom folding and bottom sealing; high speed, stable, convenient and economical.

Using this opening machine instead of manual, it can reduce at least 2-3 packers, save 5-10% consumables, increase the efficiency of 30%, greatly save cost, improve efficiency, and make packaging standardized.

Parameter :

Product model	SCK-40
Ability to open the box	10box/Min
Carton temporary storage	100pcs(1000mm)
Carton Size	L:250-500 W:150-400 H:100-400mm
Use power	220V 400W
Working pressure	6kg/cm ²
Applied tape	W48、 60、 72mm
Mechanical size	L2000W1900H1450mm
