## SC-600A External pumping Vacuum machine

### **Product description:**

Leading technology sets in Japan and Korea combine vacuum, seal and inflatable functions.

The seal adopts air pressure to completely change the phenomenon that traditional packaging is not firmly sealed.

The speed of the vacuum is very fast, and it can be done in only 2-3 seconds.

It is not limited to the size and shape of the products, especially the large size or strange shape objects can be packed in vacuum.

SC-600A has more inflatable function and can fill the necessary gas in the packaging bag.

Scope of application:

Apply to electronic products, such as semiconductor, chip, IC and so on, cloth, cotton wool products, sponge and so on, carry out vacuum packing, reduce packing volume, save your logistics cost, fill in nitrogen or other gas for food, vegetables, seafood, electronics and other products, keep fresh, original taste, and prevent impact.

**technical parameter:**

Model	SC-600A
Maximum Seal Size	L600*W10mm
Maximum packing size	L Unlimited*W600*H300mm
Outer size	L670*W460*H1020mm
Power and power	1φ220V 50/60Hz 1.8kw
Vacuum pump power	550w
Working pressure	4-6kg/cm <sup>2</sup>
Net weight	80kg
