

Hinge Durability Tester TNJ-027

Detailed Description

This tester is suitable to test goblet dark hinge and its installed base capability. Install a couple hinge on the tester and test door, test the shut force, durability, resistance to overranging. Control cabinet: Electric control components and control panel. Power sensor: sense the strength of shut force and resistance to overranging.

Specifications:

Sample: two hinges B type

Test door: height: 700mm; wide: 600mm; thickness: 19mm; weight: 6kg

Durability test: 40000 times, 18 times/min

Transfinite test: force value: 50N number: 5 times

Size: 64*60*100cm

Weight: ≈65Kg

Power: 1 ϕ AC 220V 50Hz 3A

Standards: DIN 68857 and QB/T 2189
