HD-PCT Normal temperature compression test device

The HD-PCT plug compression test device is designed according to the relevant standards and is used for plug compression test to check the mechanical strength of the plug during compression.

The device is designed according to GB2099.1-96, IEC60884-1:2006 and other standards.

Technical Parameters:

Serial number	Project	Specifications
1	Test pressure	300N
2	Lifting height	<50mm
3	Ambient temperature	23±2°C
4	Environment humidity	≤85%
5	Control method	Trapezoidal screw + handwheel manual control
6	Adjusting the horizontal mode	Adjust the height of the foot cup nut
7	Dimensions	410x 410x500 (Width X deep X height)
8	Weight	About 55 Kg
