

SANKO ELECTRONIC LABORATORY Co.,Ltd.

Metal detectors

Dec-A

Super high sensitive hand-held type specialized for security

- Super durable designing (Utility Model registered)
- Easy operation with Power switch only.
- Superior weight-balanced unit to grip and hold for a long time use.

Applications

- For security ; security guard to detect dangerous weapons such as knives and pistols

Specifications

Model name : Metal Detector Dec-A

Detecting method : Variable inductance type

Alarming method : Lamp/lamp + buzzer 2 step conversion

Detecting width : 10×4 cm

Detecting ability : Iron material(50×50×t2) ; 11cm, Aluminum material (50×50×t2) ; 9cm,
brass material(50×50×t2) ; 10cm, 100Yen, 500Yen coin ; 7.5cm,
fruit knives (stainless 10.5cm) : 10cm, awl(φ3×L55) : 5cm

Temperature : 0~50°C(non-condensing)

Power source : Dry battery LR6 (1.5V) ×2

Continuous operating hours:8 hours/day(10 times of lamp/buzzer warning) : 60 days[※]

※ When an alkaline battery is used.

※ changes depending on operating conditions and the frequency of alarming.

Dimensions and weight : 55(W)×57(H)×245(L)mm、 about 180g

Note:the detecting ability changes depending on such as the material, size, shape, distance, direction, operating conditions of the object.
